Company	Branch match	Package	Tier (verified difficulty, not portal label)
Josh Technology Group (SDE / FE / SQA)	AIML/CSE/IT	5.3L-13.47L	Product-tier bar — Trees, LinkedList, Binary Search heavy, 3 rounds
UKG	AIML,CSE,IT	12.74L	Product-tier
Oracle	CSE,ECE,IT	11L	Product-tier
Sopra Banking Software	CSE,IT	8.5L	Product-tier
Samsung R&D	AIML,CSE,CSDS	7.65L	Product-tier
Finspectra	CSE,IT	5.5L	Product-tier (limited public data — treat as Medium-focused)
Idemia	CSE	5L	Product-tier (limited public data)
Newgen (SE)	AIML,CSE,CSDS,IT	4.25L	Product-tier
Haltdos	CSE,IT	4.8L	Product-tier (limited public data)
Barco Electronic Systems	CSE	9L	Unclear — limited public interview data, prep as Medium
Reddoorz	AIML,CSE,CSDS	6L	Service-tier — basic-to-medium logic
Coastr	CSE	6L	Service-tier, limited public data
RxLogix	AIML,CSE,IT	5.5L	Service-tier
HCLTech	AIML,CSE,CSDS,ECE,IT	4.25L	Service-tier — basic logic, aptitude-heavy (confirmed pattern industry-wide)
Quokka Labs	CSE,CSDS	4L	Service-tier
Antino Labs	CSE,CSDS,IT	4L	Service-tier
Velocity Software Solutions	IT	5L	Service-tier, limited public data
Greentree Global (IT)	IT	4.51L	Service-tier, limited public data

Company	Branch match	Package	Tier (verified difficulty, not portal label)
Xcelore	IT	4L	Service-tier, limited public data
Huron	AIML,CSDS,IT	30k/mo (internship)	Service-tier
Eduversity	AIML	8L	"Others" category — unclear if coding-heavy role; verify with placement cell before assuming DSA relevance

Honest caveat: for the smaller/newer companies (Coastr, Finspectra, Haltdos, RxLogix, Quokka Labs, Antino Labs, Xcelore, Velocity, Greentree), there's little to no public interview-experience data. I'm not going to invent a difficulty tier for these — treat them as "prep for Medium, hope for Easy," and if anyone from your batch interviews there this season, that's real data worth capturing for next year.

Stretch Only — do these ONLY if you finish everything above with time to spare

None of your 21 relevant companies' verified interview data requires these. They exist for genuine safety margin if you're specifically prepping hard for Oracle/Samsung R&D style deeper rounds, or want CP-adjacent depth for personal growth. Do not let these eat time that should go to P1s above.

Bottom line

- **P1 count: ~90 problems.** That's your actual "must clear before placements" list — realistic at your ~2 hrs/day pace if you start now and stay consistent, unlike the 250-
